Memorandum

To: Distribution
 From: Paul Ferry, PE
 Highways Engineer
 Date: December 11, 2013
 Subject: Wetland Table

The Environmental Services Bureau has requested that we include the attached wetland table and associated notes in the plans for projects that have delineated wetlands. The wetland table needs to be included in all projects that have delineated wetlands, even if the total wetland impacts are less than 0.1 acre. The applicable note and the table, if appropriate, will be included in the Notes section of the plans.

The table provides a summary of wetland impacts and other related information. Consequently, it should aid resource and regulatory agencies in their reviews of MDT's applications for permits, and make the contractor aware of wetlands and permitted wetland impacts associated with the project.

We are providing some additional information concerning the help notes (1) - (6) at the bottom of the detail. Note (2) requires that wetlands without impacts be included in the table. The remarks mentioned in note (4) are typically provided by Environmental or Hydraulics personnel.

Show delineated, permanent, and temporary wetland impacts on the Detour Detail Sheet. Show delineated and permanent wetland impacts on the Plan and Profile sheets, unless otherwise directed by Environmental Services. Label delineated wetland areas on the Plan and Profile sheets with the Wetland Designation only.

Incorporate these changes into all projects with ready dates after April 30, 2014.

If you have questions concerning this, please contact me at 444-6244.
